PROFESSIONAL SUMMARY

Electrical Engineering sophomore at Union College with hands-on experience in circuit design, AutoCAD drafting and software development. Proficient in Python, Java, C++, HTML and MATLAB. Seeking an engineering internship to apply technical skills in project design, electrical systems, and software development.

EDUCATION

Union College — Schenectady, NY

Expected June 2028

Bachelor of Science, Electrical Engineering

- GPA: 3.0/4.0
- Honor: Liberty League Women's Golf Rookie of the Year (2024–25)

The Taft School — Watertown, CT

2021 – 2024

High School Diploma with Honors

TECHNICAL SKILLS

- Programming Languages: Python, Java, C++, HTML, MATLAB (signal processing, circuit simulation, data analysis)
- Engineering Tools: AutoCAD, Sketch-Up Pro, Soldering, Breadboard Prototyping, 3D Printing, Oscilloscope, Multimeter
- Embedded Systems: Arduino, C/C++ for hardware control (LEDs, sensors, motors)
- Software: Microsoft Office Suite (Excel, Word, PowerPoint)
- Languages: English (Native), French (Fluent), Spanish (Intermediate), Japanese (Basic)

WORK EXPERIENCE

Work Study Shift Leader

Oct 2025 – Present

Union College — Schenectady, NY

- Supervised and coordinated work study student teams to ensure efficient gym facility operations
- Managed equipment maintenance and monitored daily operational performance
- Demonstrated leadership by delegating tasks and tracking team productivity

Design Department Intern

2022

Samabot & Associates — Abuja, Nigeria

- Created electrical build drawings for engineering projects using AutoCAD
- Assisted in developing project execution documents using Microsoft Word and Excel
- Collaborated with senior engineers on design deliverables for upcoming construction projects

PROJECTS

Crystal Radio and Audio Amplifier

2025

Union College — ECE 101: The Joy of Electronics Lab

- Designed, built and soldered a fully functional crystal radio and audio amplifier circuit from scratch
- Applied circuit theory, signal processing and fundamental electrical engineering principles

3D Design: Custom Phone Case

2023

The Taft School — Science Laboratory

- Used Sketch-Up Pro to model and 3D print a custom phone case with precise dimensional accuracy

Streaming Website Development

2023

The Taft School — Computer Science | <https://iyene.github.io/>

- Developed a fully functional customized streaming platform using HTML as a final Computer Science project
- Designed and implemented the front-end interface and content architecture independently

Website and App Development

2025

Personal Project | <https://essieni-1.github.io/subaudit-github.io/>

- Built a website and app that uses Plaid to find every recurring charge and lets the user have the option to cancel one or all subscriptions with one click

Humidifier

2026

Union College — ECE 218: Embedded Microcontroller Projects | <https://github.com/essieni-1/Final-Project-Humidifier>

- Built and coded a humidifier that measures the humidity of a space, displays it on an LCD and depending on the space's humidity humidifies the space

Cabin AutoCAD Project

2026

Union College — CEE 101: Engineering Graphics | <https://essieni-1.github.io/portfolio-github.io>

- Created detailed cabin floor plans and elevations in AutoCAD, incorporating dimensions, construction details and architectural specifications

LEADERSHIP AND ATHLETICS

NCAA Varsity Women's Golf, Player #1

Sept 2024 – Present

Union College — Schenectady, NY

- Competing at the varsity level with a current handicap of +0.5 (scratch golfer)
- Awarded 2024–25 Liberty League Women's Golf Rookie of the Year
- Recipient of the 2025 Union Terry Lynch-Jackie Havercamp Cuttita Memorial Award for exceptional leadership, sportsmanship and athletic accomplishments
- Recipient of the 2026 Female Sophomore Athletic Prize — awarded to the outstanding sophomore athlete across all Union varsity sports

IEEE Student Member

April 2026 – Present

Union College — Schenectady, NY

- Actively participated in chapter meetings and engineering networking events
- Attended IEEE tech talk “Powering the Future: Solar Energy” featuring Dr. Sam Salem, former 20-year GE expert, gaining industry exposure to solar power systems and renewable energy engineering

COMMUNITY ENGAGEMENT

- Golf Fore Africa (2022): Participated in Pro/Am charity events supporting clean drinking water initiatives in Africa
